

Gefico

Heat Exchangers

Tailor made units

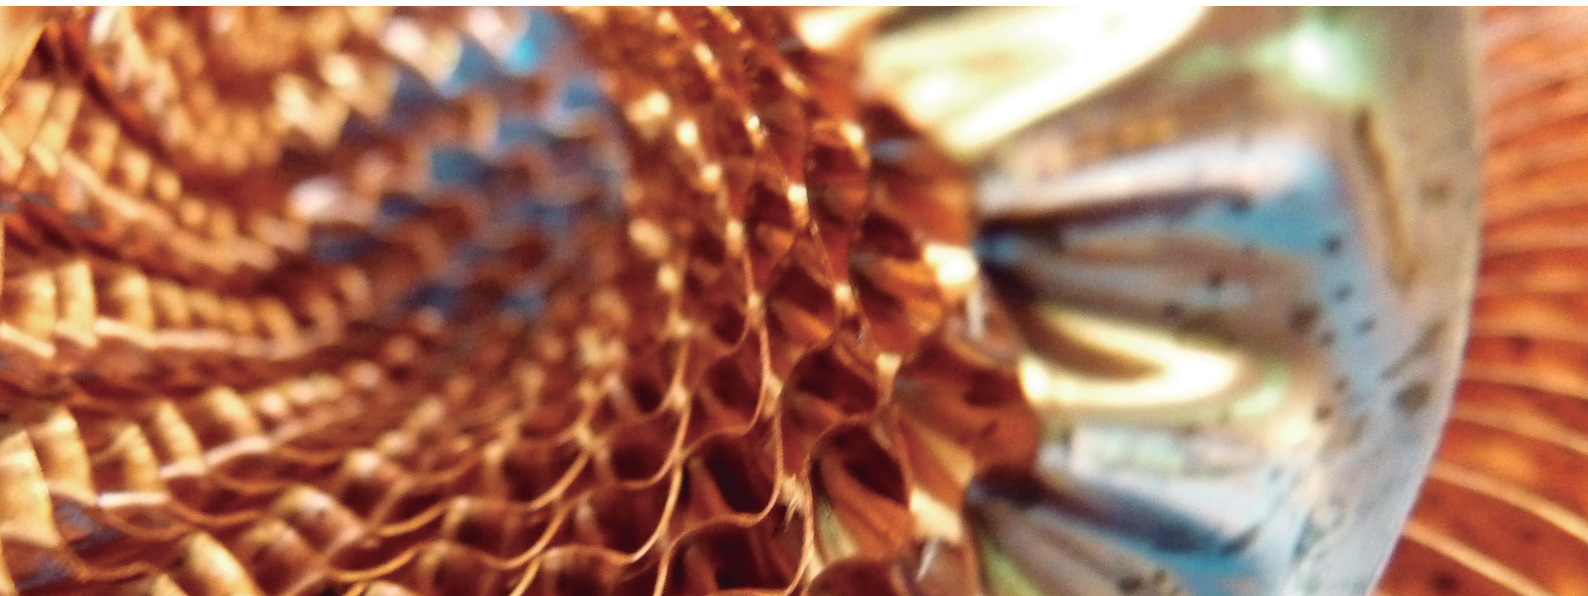

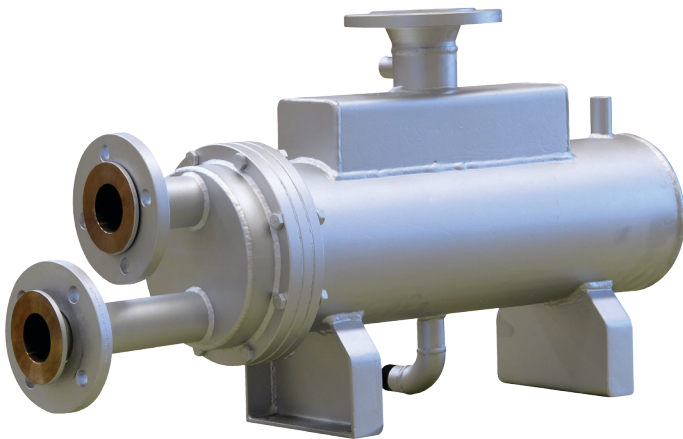

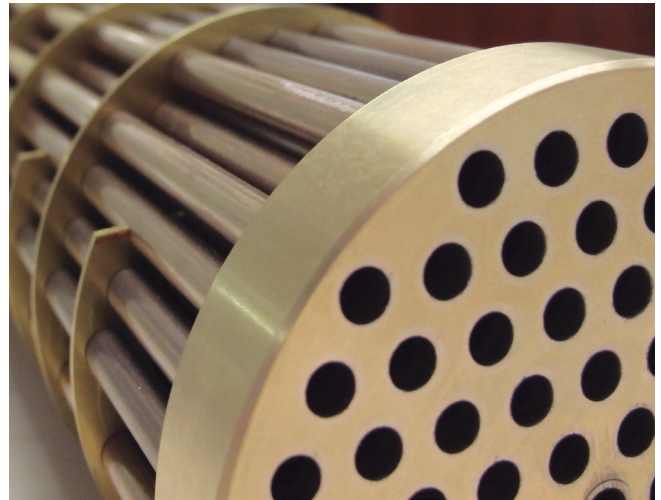

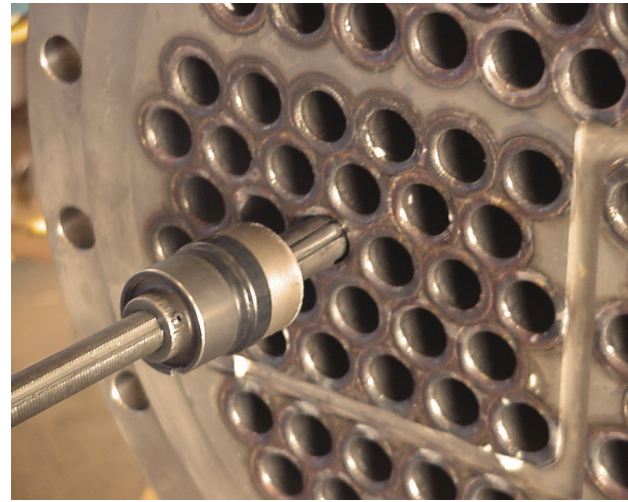

Gefico is a leading company in the area of shell & tube heat exchangers. We provide engineering, manufacturing and after sales services.

Our products and solutions are designed and intended to operate in extremely harsh conditions. Designed to last. With a longstanding experience of more than 37 years, we are able to come up with tailor-made solutions for you.

There is a large field of applications for tube type heat exchangers in marine industry. Most relevant are Jacket Water and Lube Oil coolers, Tank Cleaning and Thermal Oil.

Gefico heat exchangers are maintenance-friendly and robust; proven corrosion-resistant materials (DIN CuNi10Fe1.6Mn) are selected by means of technical, but also economic criteria.

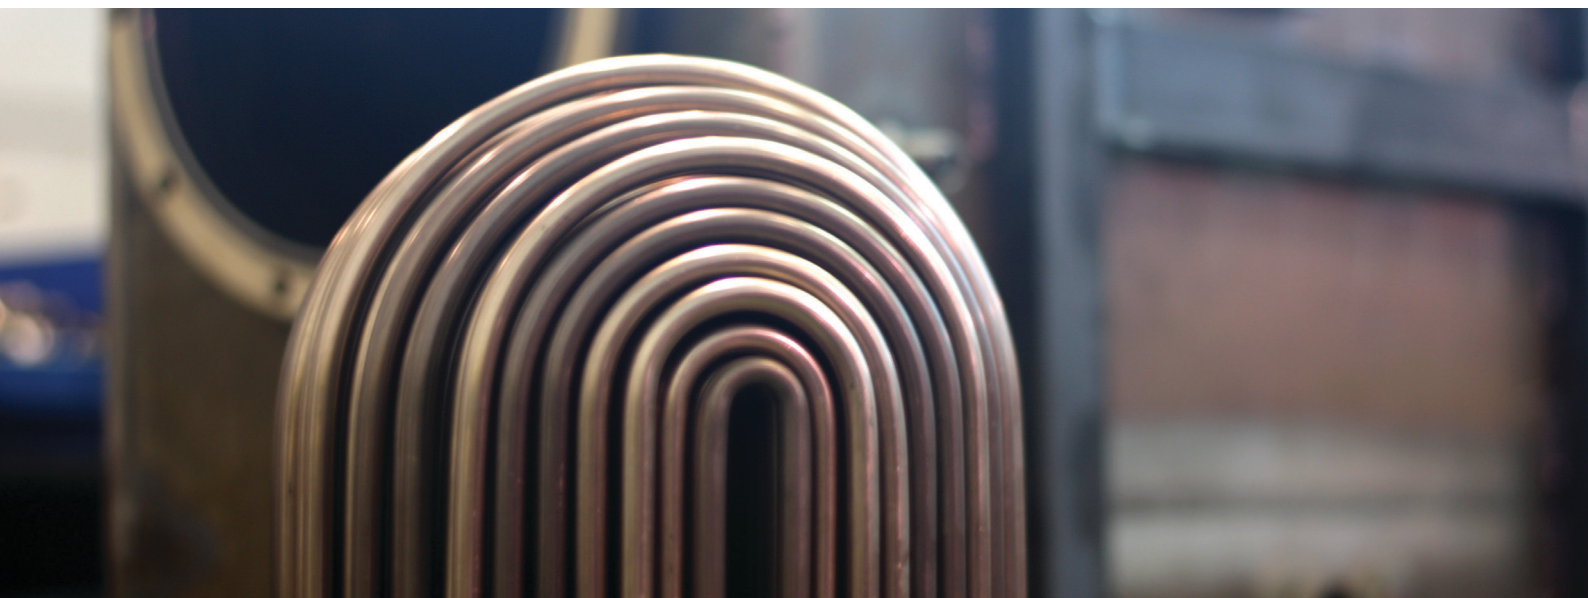

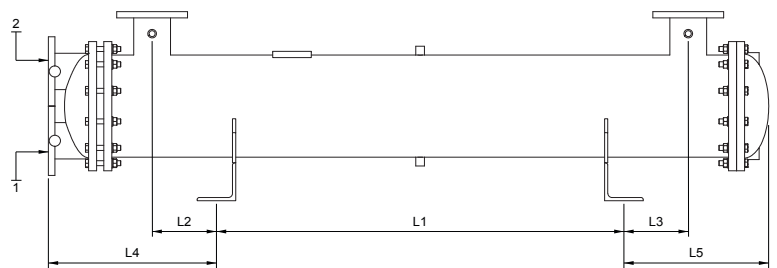

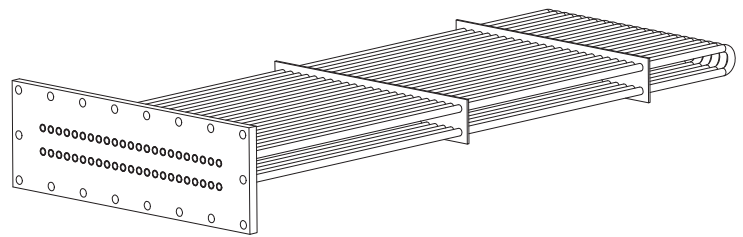

We are able to provide solutions with a very short delivery time, with most of components in stock.

Gefico After Sales & Services provide continuous support on an in-house basis, including fast and efficient supply of spare parts, re-tubing, upgrading, refurbishment of older equipment, cleaning of heat exchangers and other such functions.

We also keep large stock of cupronickel, aluminum brass and bronze to avoid delays and provide quick solutions.
